Water Report: Read meters last week. Had three leaks that came up when reading meters. Terry Long's meter is reading high, would like it to be replaced. Charles mentioned that if the meter was bad, it would be registering low, not registering high. When we change out the meter, the bill will just be higher.

Fencing Around Tower: Carl asked Dusty to get another quote on the fencing around the water tower. 30 ft x 30 ft, will be able 6 ½ ft away from the concrete around the base of the

water tower. If we stick with this bid, but go in and put down rocks, then we won't have to get in there and mow or weed eat. Also, can get away with just having one walk thru gate instead of a walk through and drive thru gate. Wanted to double check and made sure this is still the route we want to take because previous discussion was based on it being 15 ft away from the tower. Would like to double check with DEQ to see if there is a requirement on distance away from the water tower. Don't cover the overflow spout concrete. Motion made by Carrie Curtis to accept and move forward with fence after double checking with DEQ.

Seconded – Carl Long

**Water Rate Vacant
Houses:**

Currently we have a handful of houses that are on a construction rate but are vacant. The question has been raised as to if these individuals should be charged a minimum rate instead of the construction rate. Two of these houses have had leaks recently, but being on a construction rate, have not been charged for the water usage through the meter. Construction Rate might just need to go away.

Motion made by Carrie Curtis to do away with the Construction Rate
